Contents

Foreword	11
About this Book	13
I Introduction to Geospatial Technology	15
1 Spatial Data Models	17
1.1 Introduction	17
1.2 Objective: Explore and Understand Geospatial Data Models	17
1.3 Task 1 - Learn to Work with QGIS Browser	18
1.4 Task 2 - Become Familiar with Geospatial Data Models	20
1.5 Task 3 - Viewing Geospatial Data in QGIS Desktop	23
1.6 Conclusion	31
1.7 Discussion Questions	31
2 Displaying Geospatial Data	33
2.1 Introduction	33
2.2 Objective: Create a Map that Meets the Customer's Requirements	33
2.3 Task 1 - Add Data, Organize Map Layers and Set Coordinate Reference System	34
2.4 Task 2 - Style Data Layers	40
2.5 Task 3 - Compose Map Deliverable	48
2.6 Conclusion	55
2.7 Discussion Questions	55
2.8 Challenge Assignment (optional)	55
3 Creating Geospatial Data	57
3.1 Introduction	57
3.2 Objective: Digitize Information from a Scanned Hard Copy Source	57
3.3 Task 1 - Create a New Shapefile	58
3.4 Task 2 - Transforming Coordinate System of Source Data	60
3.5 Task 3 - Heads-up Digitizing From Transformed Source Data	67
3.6 Task 4 - Editing Existing Geospatial Data	71
3.7 Conclusion	72
3.8 Discussion Questions	72
3.9 Challenge Assignment (optional)	72
4 Understanding Remote Sensing and Analysis	75
4.1 Introduction	75
4.2 Objective: Learn the Basics of using QGIS Desktop for Image Analysis	75
4.3 Task 1 - Display and Inspection of Image Data	75
4.4 Task 2 - Unsupervised Classification	81
4.5 Conclusion	84
4.6 Challenge Assignment (optional)	84

5	Basic Geospatial Analysis Techniques	85
5.1	Introduction	85
5.2	Objective: Use Basic Spatial Analysis Techniques to Solve a Problem	85
5.3	Task 1 - Data Preparation	86
5.4	Task 1.1 - Obtain Shapefiles of NGS Monuments	86
5.5	Task 1.2 - Obtain the Municipal Boundaries	86
5.6	Task 1.3 - Obtain the Census Tract Boundaries	87
5.7	Task 1.4 - Obtain Road Data	87
5.8	Task 2 - Querying and Extracting Subsets of Data	87
5.9	Task 2.1 - Working with coordinate reference systems	87
5.10	Task 2.2 - Dissolving Tract Boundaries into a County boundary	89
5.11	Task 2.3 - Select Monuments	91
5.12	Task 3 - Buffering and Clipping Data	93
5.13	Task 4 - Preparing a Map	99
5.14	Conclusion	101
5.15	Discussion Questions	101
5.16	Challenge Assignment (optional)	101
II	Spatial Analysis	103
1	Reviewing the Basics of Geospatial Data	105
1.1	Introduction	105
1.2	Objective: Use Basic Spatial Analysis Techniques to Solve a Problem	105
1.3	Task 1 - GIS Data – Vector	106
1.4	Task 2 - GIS Data - Raster	107
1.5	Task 3 - Geodatabase	108
1.6	Task 4 - Coordinate Systems	113
1.7	Task 5 - GIS Data Attributes and Attribute Tables	114
1.8	Conclusion	115
1.9	Discussion Questions	115
2	Introduction to Geospatial Analysis	117
2.1	Introduction	117
2.2	Objective: Explore and Understand Geospatial Data Models	117
2.3	Task 1 - Data Exploration and Joins	117
2.4	Task 2 - Classification	121
2.5	Conclusion	125
2.6	Discussion Questions	125
2.7	Challenge Assignment (optional)	126
3	Advanced Attributes and Spatial Queries for Data Exploration	127
3.1	Introduction	127
3.2	Objective: Understanding Attribute Queries and Spatial Queries	127
3.3	Task 1 - Using Data Dictionaries and Attribute Selections	127
3.4	Task 2 - Buffering and Spatial Queries	133
3.5	Conclusion	137
3.6	Discussion Questions	137
3.7	Challenge Assignment (optional)	137
4	Vector Data Analysis - Overlay Techniques	139
4.1	Introduction	139
4.2	Objective Understanding Basic Vector Analysis Using Overlays	139
4.3	Task 1 - Clip	139
4.4	Task 2 - Intersection	142

4.5	Task 3 - Union	145
4.6	Task 4 - Join Attributes by Location	148
4.7	Conclusion	151
4.8	Discussion Questions	151
4.9	Challenge Assignment (optional)	152
5	Vector Data Analysis - Creating a Site Selection Model	153
5.1	Introduction	153
5.2	Objective: Understanding Basic Vector Analysis Using Overlays	153
5.3	Task 1 - Exploring the Data	153
5.4	Task 2 - Creating the Model - Part 1	155
5.5	Task 3 - Creating the Model - Part 2	161
5.6	Task 4 - Creating the Model - Part 3	165
5.7	Conclusion	169
5.8	Discussion Questions	169
5.9	Challenge Assignment (optional)	170
6	Vector Data Analysis - Network Analysis	171
6.1	Introduction	171
6.2	Objective: Learn the Basics of Network Analysis	171
6.3	Task 1 Basic Network Analysis	171
6.4	Task 2 Allocating Service Areas	177
6.5	Conclusion	186
6.6	Discussion Questions	186
6.7	Challenge Assignment (optional)	186
7	Raster Data Analysis - Working with Topographic Data	187
7.1	Introduction	187
7.2	Objective: Learn the Basics of Terrain Analysis	187
7.3	Task 1 Terrain Analysis	187
7.4	Task 2 Reclassification	195
7.5	Task 3 Raster Calculator	198
7.6	Conclusion	200
7.7	Discussion Questions	201
7.8	Challenge Assignment (optional)	201
8	Raster Data Analysis - Density Surfaces	203
8.1	Introduction	203
8.2	Objective: Learn Density Analysis Methods	203
8.3	Task 1 Point Density	203
8.4	Task 2 Raster to Vector Conversion	207
8.5	Task 3 Vector to Raster Conversion	215
8.6	Conclusion	217
8.7	Discussion Questions	217
8.8	Challenge Assignment (optional)	217
III	Data Acquisition and Management	219
1	Reviewing the Basics of Geospatial Data	221
1.1	Introduction	221
1.2	Objective: Explore and Understand Geospatial Data Models and File Formats	221
1.3	Task 1 GIS Data Models	221
1.4	Task 2 GIS Data File Formats	222
1.5	Conclusion	227

1.6	Discussion Questions	227
1.7	Challenge Assignment	227
2	Setting Up a Project Database	229
2.1	Introduction	229
2.2	Objective: Learn How to Normalize Data and Import it into a SpatiaLite Database	229
2.3	Task 1 Investigate and Normalize Project Data	229
2.4	Task 2 Create a New Database	234
2.5	Task 3 Populate the New Database	235
2.6	Conclusion	239
2.7	Discussion Questions	239
3	Vector Data Quality	241
3.1	Introduction	241
3.2	Objective: Learn To Verify the Quality of Vector Data with Topology Rules	241
3.3	Task 1 Topology Rules - Part 1	241
3.4	Task 2 Topology Rules - Part 2	245
3.5	Task 3 Fixing Topology Errors	245
3.6	Conclusion	250
3.7	Discussion Questions	250
3.8	Challenge Assignment (optional)	250
4	Spatial Data Quality	251
4.1	Introduction	251
4.2	Objective: Learn to Assess Data Quality, Work with Metadata and Aggregate Data	251
4.3	Task 1 Exploring Data Accuracy	251
4.4	Task 2 Metadata	253
4.5	Task 3 Data Aggregation	256
4.6	Conclusion	257
4.7	Discussion Questions	258
4.8	Challenge Assignment (optional)	258
5	Raster Data Structure	259
5.1	Introduction	259
5.2	Objective: Work with the Raster Data Model	259
5.3	Task 1 Merging and Clipping Raster Data	259
5.4	Task 2 Raster Pyramids	263
5.5	Conclusion	265
5.6	Discussion Questions	265
5.7	Challenge Assignment (optional)	265
6	Data Sources	267
6.1	Introduction	267
6.2	Objective: Learn to Map Address Data via Geocoding	267
6.3	Task 1 Geocoding	267
6.4	Task 2 Build a Map	272
6.5	Conclusion	273
6.6	Discussion Questions	273
6.7	Challenge Assignment (optional)	273
IV	Cartographic Design	275
1	Creating a Colorful Map of the United States of America	277
1.1	Introduction	277

1.2	Objective: Explore and Utilize Style Properties in QGIS to Design a Colorful Map of the United States of America	277
1.3	Task 1 Designing the Lower 48 Map	278
1.4	Task 2 Basic Labeling of States	282
1.5	Task 3 Saving and Loading QGIS Layer Style Files	287
1.6	Task 4 Designing the Alaska Map	288
1.7	Task 5 Designing the Hawaii Map	289
1.8	Conclusion	290
1.9	Discussion Questions	290
1.10	Challenge: Design a Colorful State Map (optional)	290
2	Exploring Coordinate Systems and Map Projections	291
2.1	Introduction	291
2.2	Objective: Explore and Understand Map Projections and Coordinate Systems	291
2.3	Task 1 - Setting Map Projections and Coordinate Systems in QGIS	292
2.4	Task 2 - Exploring World Map Projections	297
2.5	Task 3 - Exploring National Map Projections	298
2.6	Task 4 - Exploring State Map Projections	305
2.7	Task 5 Select an Appropriate Map Projection for Colorful Map of the USA	311
2.8	Task 6 Exploring the Universal Transverse Mercator (UTM) Coordinate System	313
2.9	Conclusion	314
2.10	Discussion Questions	314
3	Map Elements and Design	315
3.1	Introduction	315
3.2	Objective: Utilize QGIS and Inkscape to Complete the Design of the Colorful Map of the United States of America	315
3.3	Task 1 Composing and Exporting Maps	315
3.4	Task 2 Basics of Inkscape	318
3.5	Task 3 Importing and Arranging Maps in Inkscape	320
3.6	Task 4 Designing the Final Map Layout	323
3.7	Task 5 Challenge: Complete Challenge from Exercise 1 (optional)	334
3.8	Conclusion	334
3.9	Discussion Questions	335
4	IDP and Refugee Proportional Symbol Map	337
4.1	Introduction	337
4.2	Objective: Utilize QGIS and Inkscape to Complete the Design of a Proportional Symbol Map Showing Syrian IDPs and Refugees	338
4.3	Task 1 Rough Design of the Final Map	338
4.4	Task 2 Design a Proportional Symbol Map in QGIS	340
4.5	Task 3 Export Map by Layers	346
4.6	Task 4 Prepare Rough Map Design in Inkscape	348
4.7	Task 5 Challenge: Create Layout in QGIS (optional)	350
4.8	Conclusion	350
4.9	Discussion Questions	350
5	IDP and Refugee Proportional Symbol Map – Designing the Final Map	353
5.1	Introduction	353
5.2	Objective: Utilize Inkscape to Complete the Design of a Proportional Symbol Map Showing Syrian IDPs and Refugees	354
5.3	Task 1 Arrange Proportional Symbols and Apply Transparency	354
5.4	Task 2 Add Labels	357
5.5	Task 3 Create Legend, Metadata, Title, Ancillary Text, and Neatlines	360
5.6	Task 4 Final Checks for Alignment and Map Export	366

5.7	Task 5 Challenge: Add Refugee Camps to Map (optional)	367
5.8	Conclusion	368
5.9	Discussion Questions	368
6	Countries with Refugees and Internally Displaced Persons Over One Million Map Design	369
6.1	Introduction	369
6.2	Objective: Utilize QGIS and Inkscape to Complete the Design of a Choropleth Map Showing World-wide IDPs and Refugees	370
6.3	Task 1 Load and Symbolize Basemap Data	370
6.4	Task 2 Classify and Symbolize Refugee Data	370
6.5	Task 3 Symbolize IDP Data	376
6.6	Task 4 Create Legend and Export Map	378
6.7	Task 5: Design Map Layout using Inkscape	380
6.8	Conclusion	381
6.9	Discussion Questions	381
7	Design and Label a Downtown Street Map	383
7.1	Introduction	383
7.2	Objective: Utilize QGIS and Inkscape to Design and Label a Street Map of a Downtown Area	383
7.3	Task 1 Label Features using Basic QGIS Labeling Functions	383
7.4	Task 2 Improve Labels using Advanced QGIS Labeling Functions	387
7.5	Task 3 Complete Final Map Design	396
7.6	Task 4 Challenge: Design and Label a 1:2,500 Scale Downtown Street Map (optional)	396
7.7	Conclusion	397
7.8	Discussion Questions	397
V	Remote Sensing	399
1	Image Composite, Mosaic, and Subset	401
1.1	Introduction	401
1.2	Objective: Overview of Basic GRASS Raster Functionality inside QGIS	401
1.3	Task 1 – Learn Basics of GRASS GIS inside QGIS	401
1.4	Task 2 - Image Composite	404
1.5	Task 3 - Image Mosaic	407
1.6	Task 4 - Image Subset	409
1.7	Task 5 - Calculate Normalized Difference Vegetation Index (NDVI)	411
1.8	Task 6 - Challenge: Image Subset with r.patch (optional)	413
1.9	Conclusion	414
1.10	Discussion Questions	414
2	Image Rectification	415
2.1	Introduction	415
2.2	Objective: Perform an Image Rectification	415
2.3	Task 1 – Set Up Referencing Environment	415
2.4	Task 2 - Select Common Control Points	418
2.5	Task 3 – Rectify the Image	421
2.6	Task 4 – Post-Rectification Steps	423
2.7	Conclusion	423
2.8	Discussion Questions	423
3	Unsupervised Classification	425
3.1	Introduction	425
3.2	Objective: Perform an Unsupervised Classification	425
3.3	Task 1 Define New GRASS Location	426

3.4	Task 2 Learn GRASS Graphical User Interface and Concepts	428
3.5	Task 3 Import and Group Imagery, and Set Region	429
3.6	Task 4 Perform Unsupervised Classification	432
3.7	Task 5 Interpret Results	435
3.8	Task 6 Challenge: Perform a 15 Class Unsupervised Classification (optional)	438
3.9	Conclusion	439
3.10	Discussion Questions	439
4	Supervised Classification	441
4.1	Introduction	441
4.2	Objective: Perform a Supervised Classification	441
4.3	Task 1 Define New GRASS Location	442
4.4	Task 2 Import and Group Imagery, and Set Region	444
4.5	Task 3 Create Training Dataset	446
4.6	Task 4 Perform Supervised Classification	453
4.7	Task 5 Reclassify Spectral Classes to Information Classes	457
4.8	Task 6 Perform a Second Class Supervised Classification	459
4.9	Conclusion	459
4.10	Discussion Questions	460
5	Accuracy Assessment	461
5.1	Introduction	461
5.2	Objective: Perform an Accuracy Assessment	461
5.3	Task 1 Review Input Data in GRASS GIS	461
5.4	Task 2 Run the Accuracy Assessment Tool	463
5.5	Task 3 Review and Interpret the Kappa Report	463
5.6	Task 4 Challenge: Improve the Supervised Classification (optional)	465
5.7	Conclusion	466
5.8	Discussion Questions	466
	Conclusion	467
	Index	469
